

Your Way is the Right Way

The Beyontec Suite gives you all the tools you need to configure your workflows for every function — Policy, Underwriting, Billing, Claims, Reinsurance, Financial Accounting, Reports, and Queries — to do the business you do the way you want to do it.

The user-friendly dashboard lets you configure the Beyontec Suite to meet any of your requirements, without the need for error-prone programming or IT intervention. Whether you're developing new products, adding states or lines of business, or ensuring regulatory compliance, the Suite lets you do it all quickly and easily.

At the same time, the Suite's configurability tools enable you to:

- Give controlled access to agents/brokers, policyholders, reinsurers, banks, lienholders, and corporate customers
- Add new employees or producers
- Control what they can see and what they can do
- Change premium rates for existing products
- Create new policy documents and edit existing ones
- Add new fields or coverages to your existing products
- Add or modify workflows or business rules
- Create new reports
- Import or export data to many formats
- Integrate third-party APIs.
